

FDA Bioterrorism Requirements- Record Maintenance and Facility Registration

National Sugar Marketing (NSM) and its Member Partners register all production, distribution, and storage facilities utilized within our supply chain with the FDA. We actively ensure that all facilities are also re-registered with the FDA biennially each even-numbered year.

NSM has implemented the procedures necessary to comply with the FDA regulation regarding establishing and maintaining records. This includes all records necessary to provide information regarding the complete traceability of products marketed by NSM. Additional information relating to traceability can be found in our recall statement. Records are continually updated and maintained on all products.
