

## Mycotoxins & Aflatoxins

Products marketed and distributed by NSM, including granulated sugar and products produced from granulated sugar are considered free of mycotoxins. This statement includes all classes of aflatoxins; a type of mycotoxin. These toxins are metabolic products of various mold species, particularly *Aspergillus flavus* and *Aspergillus parasiticus*. The toxin-free status of NSM's products are based on refinement processes, finished good characteristics, including low water activity to prohibit mold growth, empirical data, and handling in accordance with good manufacturing practices.
